## Krobat Sheriff S1 / S2

*Krobat Sheriff S1 / S2 is an active children's wheelchair designed by Krobat. The wheelchair is for indoor and outdoor use, and is highly adaptable with numerous adjustment options.*

The child is seated on a saddle seat, which separates the legs from each other. The abducted hip position provides an open angle of the hip joints which tilts the pelvis forward into a neutral position. This, in combination with the the widespread position of the feet, creates a large base of support. The result is a very stable position that reduces the need for upper body support.

Krobat Sheriff S1 / S2 has a compact and modern design that invites participation. The smart design draws attention to the child and not the chair. The wheelchair allows more freedom of movement and variation.

## Technical data

MEASUREMENTS	DESCRIPTION	SIZE 1	SIZE 2
A	Total width	52 to 60 cm	56 to 64 cm
B	Distance between the drive wheels	38 to 46 cm	42 to 50 cm
C	Width of the backrest	26 cm	31,5 cm
D	Total length	66,5 cm	76,5 cm
E	Height of backrest	27 to 32 cm	36 to 41 cm
F	Distance from seat to footrest	19 to 38 cm	19 to 44,5 cm
G	Depth of seat (max)	28 cm	32 cm
H	Height of seat	44 to 58 cm	47,5 to 52,5 cm
I	Total height	71 to 79 cm	80 to 90 cm
J	Camber angle	4°	4°
K	Angle of backrest	0 to 90°	0 to 90°
L	Angle of seat	-15 to +15°	-15 to +15°
M	Distance between the footrests	17,5 to 35 cm	17,5 to 35 cm
	Weight	7,5 kg	7,9 kg

## Physiological benefits

Krobat Sheriff S1 / S2 provides the child with a balanced and safe sitting position with dynamic postural control which enables the child to move freely at all levels.

The sitting position gives optimal joint stability and comfort. The two articular surfaces in the hip joint have maximum contact in the sitting position.

The sitting position can prevent complications such as muscle contractures, hip pain, subluxations and scoliosis.

All major joints in the lower extremities become centered, which promotes normal muscle tone and muscle length. This is particularly important for the adductors, which are often tight in children with spasticity.

The spine can work actively in its natural curvature. The saddle seat can be adjusted to allow the pelvis to be placed/tilted in the correct position, giving the child's spine optimum working conditions.

The saddle seat enhance an active sitting position rather than a passive.

## Product description

Sheriff S1 / S2 is a light weight indoor / outdoor wheelchair with slightly cambered propelling wheels. It has great precision and is very maneuverable. Sheriff S1 / S2 is also suitable for children with impaired arm function. A compensation mechanism is available (optional) that makes it possible to maneuver the wheelchair with one hand only. This mechanism makes it easier for the child to steer straight ahead and adds minimal extra weight to the chair. This patented solution is unique and is made only by Krabat AS.

The brake handle is assembled right at the front of the saddle to make it more accessible to users and assistants alike. The brake handle locks both wheels and can be operated with one hand only. Little strength is needed to turn the brake on and off.

The seat is designed to support the pelvis in a neutral and stable position which in turn allows the spine to maintain its natural curvature. The seat and backrest of the chair can accommodate a SWASH orthosis for children who require this. The upholstery is durable and machine washable. Stains can be easily removed with a cloth.

Krabat Sheriff S1 / S2 is suitable for children with a variety of diagnoses, and it is highly adaptable. The angle and height of the seat and backrest, the width of the propelling wheels, and height and position of the footrests can easily be adjusted to find the optimum sitting position. All angles and positions can be set infinitely. Krabat Sheriff S1 is available with 20" propelling wheels. The Sheriff S2 is available with 22" or 24" propelling wheels. A hip belt and footrests with straps are included as standard equipment. A push bar, anti-tip protection, clothing guards, spoke guards and a variety of different waistcoats and support straps are optional. For children in need of extra upper body support, the Sheriff S1 / S2 can be delivered with the Plus backrest and optional Plus equipment.

To fully benefit from the wheelchair, the child should have some truncal stability, however an independent sitting function is not necessary.

Krabat Sheriff is not a comfort chair, but a chair for activities and social participation.

## Push bar

A push bar is available, and is easily mounted and dismantled

## Plus backrest

Plus backrest for additional upper body support

## Details

Easy accessible brake handle

Compensation mechanism for one-hand driving

## Equipment

Knee-strap

Gel cushion

Anti-tip

Spoke guards

Clothing guards

## Color map

Krabat Sheriff is available with the following cushion colors:

Red

Sand

Grey

Pink

Blue
