

# Jump beta

Foldable all-rounder

**S.ORG**<sup>®</sup>  
Rollstuhltechnik

Frame version Swing-away

Frame version Sport

- **Jump beta** is a foldable activity wheelchair for adolescents and adults from a seat width of 30 cm.
- **Jump beta** continues a mobilization initiated in early childhood up to a high adult age.
- **Jump beta** is the versatile following model of the smaller **Jump alpha** and even exceeds its enormous range of options.
- **Jump beta** has various frame versions: Sport frame or Swing-away frame (hinged and completely removable leg support) - and all versions are available in XL-format.
- **Jump beta** is a real champion of variety for an exact therapeutic definition of use.

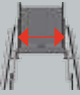

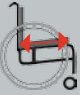

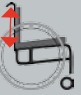

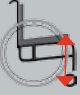

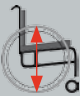

**Jump beta** with a Sport frame closed in the front. Thanks to its double cross brace it obtains a stability and torsion-resistance similar to a rigid frame.

**Jump beta** with a swing-away frame. Its leg support can be hinged outwards or removed completely for a better transfer into the wheelchair or a closer approach of tables etc.

**Jump beta** with an elevating foot rest for the positioning of the legs with a physiologic pivot point. This leg support can be combined with the swing-away leg support without any modification.

## Measures and Details

 SW 30-50 cm 2 cm-steps	 SD 34-50 cm 2 cm-steps (opt. growable up to 4 cm)	 BH 25-50 cm 5 cm-steps (shiftable by 2.5/5 cm)
 Seat height back min. 34 cm max. 58 cm	 Seat height front min. 39.5 cm max. 58 cm	 Distance Seat to footplate: max. 52 cm LLL= Distance PLUS cushion
 22" 24" 26"	 4" 5" / 5.5" 7"	 max. weight capacity 120 kg

## Standard version

- Foldable aluminium frame, straight or abducted
- Closed Sport frame or frame with completely removable and hinged leg support (Swing-away frame)
- All frames available in XL version (optional)
- Adjustable seat and back cover
- Standard- or profile wheels with integrated handrims, each with quick-release axles, with pneumatic or flat free tyres
- Caster wheels with aluminium fork in different versions
- Knee lever brake
- Many different finish alternatives: shiny, matt, metallic, coarse structured or dormant

Leg support completely removed.

Perforated plate of the XL frame (for tall people).

For easier transfer the desk sideguards can be folded away backwards.

**Jump beta** can be folded very small.

One of the many options of **Jump beta**: the back is adjustable in angle.

## More Options
