

Kika

Tilttable wheelchair for children

S.ORG[®]
Rollstuhltechnik

- In **Kika** lying, sitting, sleeping or being active is possible in a rhythm the child determines with his/her remaining physical possibilities.
- From an age of approx. 12 months **Kika** supports all fundamental development stages by mobility with an upright posture at the same time.
- **Kika** is adaptable in seat width, -depth and back height.
- **Kika** enables a positive balance of forces without tiring its users.
- The firm curved back plate can easily be extended to a head rest.
- The seat-back-unit is tilttable with a gas pressure spring by 25°. **Kika** stays very lightweight though (in running order from 9.6 kg incl. double anti-tipper). The back is adjustable in angle from 80° - 120° and completely stowable.
- **Kika** not only has as a design which is appropriated for children but is also a real eye-catcher.

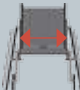

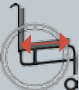

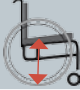

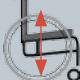

With its attractive design **Kika** helps its users to forget the impression of a medical aid.

Small wheelchair, big effect: **Kika** is the perfect combination of a buggy and a tiltable wheelchair for children for active phases and for regaining energy..

Measures and Details

	SW 20-30 cm 2 cm-steps		ST 20-30 cm 2 cm-steps		BH 20 - 45 cm (+ 2.5 cm each) 5 cm-steps
	Seat height high 37.5-42.5 cm		Seat height low 35-40.5 cm		Lower leg length max. 29.5-37 cm
	20" 22" 24"		4" 5" 5.5" 6"		Max. user weight 40kg

Standard Version

- Rigid aluminium frame (optionally adaptable) with firm wheelbase, 10 cm abduction
- Seat unit steplessly tiltable from 3° to 25°
- Back angle adjustable from 80° -120° and stowable
- Seat position for active driving easily and steplessly adjustable
- Firm seat plate **SitzFix** made of aluminium for optimal pelvis support
- Standard-, lightweight- or profile wheels with integrated handrims, each with quick-release axles, pneumatic or flat free tyres
- Stabilizer bar
- Side guards made of plastic-alu-combination
- Bowden cable brake integrated in wheel cover
- Double-sided anti-tippers
- Many different finish alternatives
- Caster wheels with alu fork in many different versions

Back angle at 120°, seat unit not tilted.

Back angle at 90°, complete seat unit tilted by approx. 30°.

The patented and retractable head rest gives its little user the greatest possible room to move in phases of activity...

...and can be pulled out in no time at all. This turns the activity wheelchair into a kind of buggy where the little user can rest in a comfortable way.
