

Mio

The compact power package for early starters

S.ORG[®]
Rollstuhltechnik

Mio with Retro frame und a slight v-shaped abduction.

- Very lightweight activity wheelchair for children
- The perfect power package for early rehabilitation
- Activates children from an age of 12 months
- Innovative frame concept for the easy adjustment of the respective physiologic pivot point
- Two frame versions (*Retro-* or *Taurus* frame) with varying degrees of v-shaped abduction
- Frame sizes from 18 to 30 cm seat width
- Adaptable in three dimensions without additional components
- Manifold cloth, colour- and component options

Here you can see all three frame versions: (f.l.t.r.) **Mio Retro** with strong v-shaped abduction, **Mio Taurus** with strong v-shaped abduction and **Mio Taurus** with slight v-shaped abduction, which is of course also possible with **Mio Retro**.

The finish alternative chosen for this **Mio Taurus** is Dark Blue matt.

Measures and Details

 SW 18-30 cm (+ 2 cm) 2 cm-steps	 SD 18-30 cm (+ 4 cm) 2 cm-steps	 BH 17.5-35 cm (+ 5 cm) 2.5 cm-steps
 Seat height back 34-36.5 cm 36-38.5 cm 38.5-41 cm	 Seat height front 34-38.5 cm 36-40.5 cm 38.5-43 cm	 Lower leg length 15-35 cm
 20" 22" 24"	 4" 5" 5.5"	 Max. user weight 50 kg

Standard Version

- Rigid aluminium frame with two possible abductions
- Adaptable in SW (2 cm), SD (min. 4 cm) and BH (5 cm)
- Frame version *Taurus* or *Retro*
- Back angle adjustable from 80° -120°
- Stepless adjustment of seat position for active driving
- Aluminium seat plate for perfect pelvis support (optional with seat inclination)
- Firm curved back plate in two versions
- Standard-, lightweight- or profile wheels (with integrated handrims), quick-release axles, pneumatic or flat free tyres
- Bowden cable brake integrated in wheel cover
- Many different finish alternatives
- Different caster wheels with alu fork

This **Mio Retro** is equipped with a single-hand push handle that can be folded downwards - especially recommendable while playing with other children.

The **Outdoor-Front-End** (possible with all variants) makes active and passive driving on soft and uneven ground such as forest paths or pedestrian areas a lot easier.

More Options

- Anatomical seat and back cushions
- Seat and back cushions in many different colours
- Foot plate continuously adjustable in height, depth and angle
- Push handles or bar adjustable in height and angle
- Different positioning aids
- More than 250 different spoke cover designs
- Outdoor-Front-End and special tyres
- Therapy table and water bottle
- Anti-tippers and much more

Here you can see the two different degrees of V-shaped abduction: on the left the slight abduction (max. 3 cm each side) and on the right the strong abduction (max. 6 cm each side).
