

# ABSOLUTELY INDIVIDUAL

With an electric wheelchair from MEYRA, people with disabilities, elderly people and users with severe dysfunctions can take part in everyday life again. Each electric wheelchair from our range of products is characterised by sophisticated equipment features and versatile customization options.

The basis of our special controls is the R-NET-wheelchair control system. It has been further developed as a technologically innovative basis with high demands on the driving behaviour, the adaptation options and user-friendliness. The programmable, open system leaves plenty of scope for individual solutions.

The MEYRA special control concept includes a variety of solutions, such as table controls and chin controls, as well as various joystick variants and joystick attachments. Due to the compatibility with many other third-party special and environmental controls and the high competence of MEYRA's special construction, we make almost everything possible for you. An electric wheelchair from the series can be easily adapted to the individual capabilities of the user.

# CONTROL

**R-NET control module**  
with large 3.5" LCD-colour display and  
IR function, as well as Bluetooth for Win-  
dows, Android and IOS  
CODE/Article No.: 398-702/206931800

- + 3.5-inch colour LCD display with: Battery capacity display, time, speed in "km/h", distance in "km", graphical display of either speed or energy consumption
- + Driving function with 5 speed levels
- + Lighting, signal indicator
- + Max. 6 (Nemo: 8) electric seat adjustment functions
- + Fault messages via plain text
- + Integrated Bluetooth module for independent control of smartphone and / or PC via the wheelchair control
- + Infrared module for stand-alone remote control of devices in the immediate vicinity (e.g., TV, hi-fi system, light switch)
- + Connection with external ON/OFF and MODE button, as well as separate seat control keyboard
- + Ergonomic design: Display is also visible with a more reclined backrest
- + Built-in light sensor for automatic adjustment of screen brightness
- + Loudspeaker for a louder horn
- + Metal housing for greater durability

**R-NET control module**  
with LCD colour display  
CODE/Article No.: 416-702/206849900

- + Colour LCD display with: Battery capacity display, time, speed in "km/h", distance in "km", graphical display of either speed or energy consumption
- + Driving function with 5 speed levels
- + Lighting, signal indicator
- + Max. 6 (Nemo: 8) electric seat adjustment functions
- + Fault messages via plain text
- + Connection with external ON/OFF and MODE button, as well as separate seat control keyboard

**R-NET control module**  
with LED display  
CODE/Article No.: 415-702/206849700

- + Very clearly visible LEDs
- + Driving function with 5 speed levels
- + Lighting and signal indicator
- + Max. 6 electrical seat adjustment-functions
- + Indicator of battery capacity
- + Fault messages via blink code of the battery indicator

**OMNI special and environmental control**  
CODE/Article No.: 4571/1071612

- + With all the functions of the LCD control module (without the joystick)
- + Infrared remote control functions
- + Basis for a variety of special controls

## INPUT & OPERATION

**Neckband**  
CODE/Item No.: 4940/1077311  
Adjustable shoulder and neck strap for chin or lip control.

**Table control**  
CODE: 813-73 (right side)  
The control module is integrated in the tabletop and can be easily rotated by 180°, so that a level table surface is formed. The tabletop can be swivelled to the right or to the left.

**Bluetooth Module**  
CODE/Article No.: 794/1072889  
The Bluetooth module allows controlling a PC's mouse or an Android smartphone via the joystick.

**Electrical or manual chin control**  
CODE/Article No.: 565/1074111 (electrically) or 810/1072890 (manually)  
The chin control is mounted on the push bar of the wheelchair. The operating elements (chin control joystick, on/off button and mode-key), including the holder can be swivelled side to side electrically or manually by hand.

**Tabletop with a cut-out for control module**  
CODE: 4661 (left) and / or 4660 (right)  
The control module is integrated in the tabletop and attached using a magnet. This makes the control module easy to remove. The table top can be swivelled to the right or to the left.

**External seat control key-board**  
CODE/Article No.: 4615-4597/1082020 (Assembly of control module side)  
CODE/Article No.: 4615-4599/1082071 (Assembly set in contrast)  
Direct selection and activation of up to five seat adjustments, such as tilting or a programmed stand-up process, even while driving. With built-in USB port for smartphones and tablets.

**Buddy button**  
On/Off  
CODE/Article No.: 543/206904500

**Green Pikko-button**  
On/Off  
CODE/Article No.: 778/1072885

**Yellow Buddy button**  
Mode function  
CODE/Article No.: 596/206904600

**Yellow Pikko-button**  
Mode function  
CODE/Article No.: 779/1072886

## JOYSTICKS & ATTACHMENTS

**MicroPilot Joystick**  
CODE/Article No.: With Pad/4600/1077314 (Recording), without pad/4611/1077312 (Recording)  
The zero-distance-joystick is extremely smooth-running, controllable with only very minor muscle strength and includes wrist rest and holding fixture..

**Micro-Guide Joystick**  
CODE/Article No.: With Pad/4601/1077315 (with support / recording), 4612/1077313 (without support / recording)  
The Joystick with the small distance is extremely smooth-running and controllable without great muscle power. It includes wrist rest and holding fixture..

### DIFFERENT JOYSTICK ATTACHMENTS

An individual adaptation to the operating possibilities of the user is offered for R-Net and VR2 controls.
